

DOUGLAS LABORATORIES® PRESENTS...

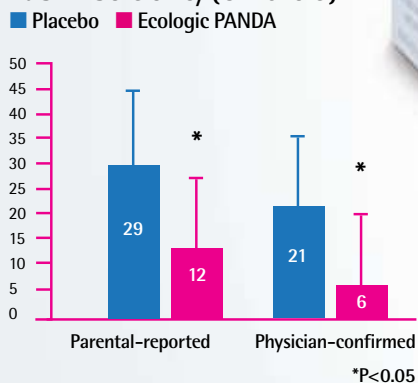

# InfaSkin Probiotic™

Designed especially for mother and baby.

RAISING THE STANDARD FOR A HEALTHY IMMUNE SYSTEM.†

## % Skin Sensitivity (3 months)

## Ecologic® PANDA †

Ecologic® PANDA is a multi-species probiotic designed and produced by Winlove Bio Industries BV in Amsterdam, NL.

Ecologic® PANDA has been designed for the health and well-being of mothers and their babies. It not only supports gastrointestinal and immune health, but when used appropriately, may also significantly contribute to skin health in infants.†

In a large, double-blind, placebo-controlled study, Ecologic® PANDA, consisting of *Bifidobacterium bifidum*, *Bifidobacterium lactis*, and *Lactococcus lactis* was administered to women during their last 6 weeks of pregnancy and postnatally for 12 months to their offspring.

After 6 weeks of prenatal and 3 months of postnatal administration, infants in the probiotic group experienced significantly less skin sensitivity at 3 months compared with those in the placebo group.†

“Friendly bacteria are vital to proper development of the immune system... and absorption of food and nutrients.”

— National Institute of Health, National Center for Complementary and Alternative Medicine.
