

Immu-Support Formula

DESCRIPTION

Immu-Support Formula provided by Douglas Laboratories® is a unique and comprehensive combination of vitamins, minerals, herbals, and other phytonutrients carefully formulated and specifically designed to offer nutritional support for individuals desiring increased immune support and cellular health. †

FUNCTIONS

Studies show that a high percentage of adults in North America and other developed countries eat less than the minimum daily allowance of 10 or more essential nutrients. Adequate amounts and proper balance of these nutrients are needed not only for maintaining good health, but also for the dietary management of the body's structure, as well as the optimum functioning of its various systems, including the immune system.

The Immu-Support Formula has been carefully developed to contain the right proportions of vitamins, minerals, trace elements, and other nutrients such as antioxidants, herbs and medicinal mushrooms to serve as a foundation for cellular and immune health.† Each ingredient is selected in consideration of its absorbability, competitive relationship with other nutrients, allergenic potential, and long-term safety. Certain nutrients such as beta-carotene, vitamin C, vitamin E and B-complex vitamins are included in high-potency amounts because of the vital roles they play in antioxidant support, energy production, the maintenance of healthy blood cells, the nervous system, hormonal balance, and more. †

Immu-Support Formula offers intensive support for the healthy functioning of the body in general, while also containing a blend of herbs and nutrients specifically formulated to offer additional immune support. †

INDICATIONS

Immu-Support Formula tablets may be a useful dietary supplement for those who wish to nutritionally support their body's immune system.
