Vitamin C
1,000 mg

DESCRIPTION
Vitamin C, provided by Douglas Laboratories, contains 1000 mg of vitamin C as L-ascorbic acid per tablet.

FUNCTIONS
Vitamin C (ascorbic acid) has numerous biological functions. Foremost, it is essential for the synthesis of collagen and glycosaminoglycans which are the building materials of all connective tissues, such as skin, blood vessels, tendons, joint cartilage and bone. Vitamin C is the required coenzyme for two groups of enzymes that catalyze the crosslinking of collagen fibers-lysyl hydroxylases and prolyl hydroxylases. As such, vitamin C is essential for normal wound healing and capillary health.†

Vitamin C is among the most powerful antioxidants in humans and animals. It is a water-soluble, chain-breaking antioxidant that reacts directly with superoxide, hydroxyl radicals, and singlet oxygen. Laboratory studies show that vitamin C completely protects lipids in plasma and low-density lipoprotein (LDL) against peroxidative damage. In addition, vitamin C interacts with glutathione and alpha-lipoic acid, and regenerates vitamin E. The antioxidant functions of vitamin C appear to have clinical significance in providing protection from free radical damage to the eyes, lungs, blood and the immune system.†

Vitamin C is absorbed in the small intestine by a sodium-dependent transport process that is intake dependent. Absorption efficiency and vitamin C utilization may be greatly enhanced during conditions of physiological stress, such as trauma or infection. Maximal absorption is attained by the ingestion of several doses spaced throughout the day rather than in one, larger dose.

INDICATIONS
Vitamin C may be a useful dietary supplement for those who wish to increase their daily intake of this important antioxidant vitamin.

FORMULA (#82106)
Each tablet contains:
L-ascorbic acid .................................................................................................. 1,000 mg

SUGGESTED USE
Adults take one tablet daily with a meal or as directed by a healthcare professional.

SIDE EFFECTS
High dosages of Vitamin C consumed at one time may cause bowel distress or diarrhea.

STORAGE
Store in a cool, dry place, away from direct light. Keep out of reach of children.
