Phosphatidyl-SERINE Capsules
Memory and Cognitive Support

DESCRIPTION
Phosphatidylserine capsules, provided by Douglas Laboratories, provide plant-derived (soybean) phospholipids supplying 100 mg of phosphatidylserine (PS) for support of neurological functions. †

FUNCTIONS
Phosphatidylserine (PS), a phospholipid nutrient, is active in cell membranes and is the major acidic phospholipid component in the membranes of the brain. Membranes are the working surfaces of every cell, carrying out the essential functions of cellular communication and hormonal signal transduction. Nerve cells, in particular, depend on healthy membrane function for normal neurotransmitter metabolism and nerve signal transmission. PS occupies a crucial role in many of these membrane-associated nerve cell processes. The fundamental function of PS is to help maintain proper membrane fluidity, which has major implications on most membrane functions. † In the brain, PS helps maintain normal capacity for acetylcholine release and thus is important to the cholinergic neurotransmitter system. † PS has similar functions in the dopamine, noradrenaline and serotonin dependent neurotransmitter systems. It is also needed for sodium and potassium transport via its influence on ATPase activity. PS assists in maintaining adequate glucose utilization in the brain. † Glucose is the preferred energy substrate for nerve cells which, unlike other cells, are unable to use fatty acids or proteins for energy production. Brain glucose utilization, an indicator of brain activity, often declines during aging. Another related function of PS is its role in controlling the normal balance of stress hormones. PS is involved in the body’s response to counterbalance the excessive release of adrenocorticotropic hormone (ACTH) and adrenaline after physical stress from exercise, while supporting normal growth hormone release at the same time. † Dietary PS is efficiently and rapidly absorbed in the intestine, taken up into the blood, and readily crosses the blood-brain barrier to reach the nerve cells of the brain.

INDICATIONS
Phosphatidylserine capsules may be a useful dietary supplement for individuals who wish to support the body’s nervous system and brain function.

FORMULA (#83004)
Each capsule contains:
Phosphatidylserine (from soy) ........................................100 mg

SUGGESTED USE
One capsule daily with a meal or as directed by a healthcare professional.

SIDE EFFECTS
No adverse side effects have been reported.

STORAGE
Store in a cool, dry place, away from direct light. Keep out of reach of children.
