Pregnenolone 5mg

DESCRIPTION
Pregnenolone 5 mg, provided by Douglas Laboratories® contains the highest purity pregnenolone and is produced under strict Good Manufacturing Practices (GMP) standards.

FUNCTIONS
Pregnenolone is often referred to as the grandparent precursor to steroid hormones in mammals. Pregnenolone is synthesized from cholesterol in the mitochondria of adrenal glands. Pregnenolone is also made to a lesser extent in the brain, liver, skin, testes and ovaries. Once synthesized, pregnenolone is released from the mitochondria into the cytosol where it can be converted to DHEA (dehydroepiandrosterone) or to progesterone. DHEA serves as a precursor compound to the androgens and the estrogens through androstenedione as the intermediate compound. Progesterone is the precursor to cortisol, aldosterone, androstenedione, estrogen, and testosterone. Pregnenolone may also be secreted directly into the blood where it circulates primarily as the sulfated form. Pregnenolone has many actions of its own not attributable to its conversion to progesterone or to DHEA. Recent studies show that pregnenolone is important for the function of brain, nervous tissue, liver, pancreas, reproductive tissues, pituitary and skin. Pregnenolone is found in higher concentrations in the central nervous system compared to the peripheral tissues which may reflect its importance in brain function. As with many hormones, pregnenolone production declines with age. It is estimated that pregnenolone production is about 60% less at age 75 than at age 35. Pregnenolone levels may also decline under various conditions of physiological stress, such as acute and chronic infections and trauma.

INDICATIONS
Pregnenolone tablets may be a useful nutritional supplement for individuals wishing to supplement their diet with pregnenolone for hormone support.

FORMULA (#83057)
Each sublingual bisect tablet contains:
Pregnenolone .............................................................. 5 mg
(3-alpha-hydroxy-5-beta-pregnen-20-one)

SUGGESTED USE
Please consult your physician before using this product.
As a dietary supplement, take ½ to 1 tablet daily, or as directed by your healthcare professional. Take by dissolving in mouth, or water or juice. The tablet can also be swallowed.

SIDE EFFECTS
No adverse side effects have been reported.

STORAGE
Store in a cool, dry place, away from direct light. Keep out of reach of children.
