Hesperidin Methyl Chalcone
A Methylated Form of the Flavonoid Hesperidin

DESCRIPTION
Hesperidin Methyl Chalcone capsules, provided by Douglas Laboratories®, contain 500 mg of the flavonoid hesperidin methylchalcone.

FUNCTIONS
Hesperidin methylchalcone is a methylated derivative of the flavonoid hesperidin. Hesperidin methylchalcone supports and protects the integrity of the vascular system with particular activity in the capillaries and veins. Hesperidin methylchalcone has been shown to help strengthen capillaries by increasing capillary resistance and decreasing capillary permeability. Increased venous motility, tone, and the ability of vessels to dilate are also enhanced by hesperidin methylchalcone.

INDICATIONS
Hesperidin Methyl Chalcone capsules may be a beneficial nutritional supplement for individuals who wish to obtain the beneficial properties of this flavonoid derivative.

FORMULA (HMC)
Each capsule contains:
Hesperidin Methyl Chalcone ................................................................. 500mg

SUGGESTED USE
One to two capsules daily or as directed by a physician.

SIDE EFFECTS
No adverse side effects have been reported.

STORAGE
Store in a cool, dry place, away from direct light. Keep out of reach of children.
