

DETOXIFICATION SUPPORT PROTOCOL

A SUGGESTED NUTRITIONAL PROTOCOL TO SUPPORT DETOXIFICATION†

Week One: INTESTINAL CLEANING

Ultra-D Tox™ Capsules:

Before liver detoxification, it is helpful to detoxify the intestine to limit the reabsorption of the toxins which will be eliminated by the liver. Ultra-D Tox capsules help to achieve this.†

Product Code: 7594 **Suggested Usage:** One capsule 30-60 minutes before each meal for 2 weeks duration.
Drink 6-8 glasses of water daily.

Metabolic Cleanse™:

A low allergenicity protein supplement containing beneficial amounts of pea, rice and fish proteins, blended with a full spectrum of vitamins and minerals. Designed to provide complete GI support for a detoxification protocol.†

Product Code: 57089 **Suggested Usage:** One scoop in water or juice, one to two times per day.

Week Two: LIVER CLEANING

Livdetox™:

A synergistic blend of nutrients for detoxifying and supporting liver health.†

Product Code: 7600 **Suggested Usage:** One tablet with each meal.
Continue to drink 6-8 glasses of water daily.

Metabolic Cleanse™:

Continue taking one scoop daily

Week Three: CONTINUED INTESTINAL CLEANING

Ultra-D Tox™:

Suggested Usage: One capsule, 30-60 minutes before each meal. Continue to drink 6 to 8 glasses of water per day. If a laxative effect is experienced at any time throughout the regimen, decrease dosage until effects subside.

Metabolic Cleanse™:

Continue taking one scoop daily

ADDITIONAL SUPPLEMENTS FOR A DETOXIFICATION REGIMEN

BroccoSabi™:

A unique combination of true Japanese wasabi with a specially standardized broccoli sprout concentrate to support the body's natural detoxification processes.†

Product Code: 99245 **Suggested Usage:** Two vegetarian capsules daily with meals

Lipoic Acid (100mg.):

Product Code: 83006 **Suggested Usage:** One capsule, twice daily

De-Mer-Tox™:

If further detoxification is needed for amalgam-sensitive patients, this would then be used in STEP TWO.

Product Code: 80317 **Suggested Usage:** Two capsules daily
