

ANDROGEN BALANCE FOR WOMEN

Developed with Joseph J. Collins, R.N., N.D.*

Protocol Objective:

Androgen balance is important for healthy functioning of tissues in women. Women's thyroid health and follicular health, in addition to insulin function and glycemic control, are all dependent on proper androgen function. This protocol differentiates the specific support needs for androgen balance.‡

CLINICAL OBJECTIVE*	ASSESSMENT	PRODUCT RECOMMENDATIONS*	DOSING
Support health of androgen-sensitive tissues	<p>Lab: Assess androgens (testosterone, androstenedione, DHEA, DHT)</p> <p>Patient presents with abdominal fat, acne, Adam's apple, aggression, sugar craving, salt craving, deepening of voice, irregular menstrual cycles, excess facial hair, imbalanced blood glucose, irritability, oily skin, scalp hair thinness, difficulty sleeping/breathing</p>	<p>TestoQuench™ For Women Formula: 201352</p>	2-4 capsules daily with food
Support function of the Glucose-Insulin-System (GIS) and cardiometabolic health	<p>Lab: Assess HgbA1c, glucose, insulin, lipid profile, testosterone, estradiol, estrone, androstenedione, DHEA, DHT, T/E ratio analysis</p> <p>Consider for all patients with BMI of greater than 24.9. Strongly consider for all patients with BMI of 30 or higher</p>	<p>GlucoQuench™ Formula: 202298</p>	2-4 capsules daily with food
Support progesterone production and progesterone function	<p>Lab: Assess progesterone Note: Suboptimal endogenous progesterone can exacerbate clinical presentation of high androgens</p> <p>Patient presents with generalized aches, agitation, blood sugar fluctuations, muscle cramps, fatigue, anxiousness, irritability, mental foginess, mood changes, morning fatigue, nervousness, twitches, difficulty sleeping</p>	<p>If indicated, add: ProgestoMend™ Formula: 201388</p>	2-4 capsules daily with food
Support estrogen function	<p>Lab: Assess estrogens Note: Suboptimal estrogen function can exacerbate clinical presentation of high androgens</p> <p>Patient presents with breast shrinking, difficulty completing sentences, forgetfulness, emotional, decreased libido, difficulty falling asleep or staying asleep, diminished orgasm, easily confused, fatigue, fluid retention, hot flashes, irritability, joint discomfort, decreased motivation, mood changes, night sweats, restlessness, vaginal dryness, weight gain</p>	<p>If indicated, add: EstroMend™ Formula: 201353</p>	2-4 capsules daily with food
Support immune balance	<p>Lab: Assess CRP or cytokine levels</p> <p>Patient presents with generalized body aches and discomfort, or other signs of endogenous systemic imbalances</p>	<p>If indicated, add: Wobenzym® Plus Formula: 201910 OR Wobenzym® N Formula: 201213</p>	2 tablets, twice daily without food 3 tablets, twice daily without food
Support thyroid health	<p>Lab: Assess T3, T4 and/or Reverse T3 (rT3), and/or T3/rT3 ratio, and/or anti-TPO or anti-TG levels</p> <p>Patient presents with weight gain, cloudy thinking, fatigue, hair loss, cold hands and feet, constipation, feelings of sadness</p>	<p>If indicated, add: ThyroMend™ Formula: 201381</p>	2 capsules daily with food
