D.L.Ultra Dophilus Powder
Beneficial flora for healthy intestinal function

DESCRIPTION
D.L. Ultra Dophilus powder, provided by Douglas Laboratories®, contains over four billion beneficial Lactobacillus acidophilus organisms per serving.

FUNCTIONS
Oral supplements of live, beneficial intestinal micro-organisms for nutritional health and well-being are known as probiotics. Probiotic dietary acidophilus colonize the intestinal tract, depending on the specific bacterium-to-host affinity. Bacteria are continually in competition for colonization space. The original bacterial colonies have an advantage over transient bacteria. Nevertheless, the composition of the intestinal microflora is dynamic and constantly changing.
If harmful microorganisms proliferate, the equilibrium is disturbed, and it becomes difficult even for indigenous bacteria to maintain their necessary territory to colonize the intestine. Antibiotics tend to kill off both beneficial and harmful bacteria, and thus may also disturb the normal, healthy balance of intestinal microorganisms. When potent probiotic supplements, such as D.L. Ultra Dophilus, are supplied regularly, chances are greatly increased for establishing and maintaining a healthy population of beneficial intestinal microorganisms. Once established, a normal intestinal microflora rich in lactobacilli creates acidic conditions that are unfavorable for the settlement of pathogenic microorganisms.

INDICATIONS
D.L. Ultra Dophilus powder may be a useful dietary supplement for those who wish to support their intestinal microflora with meaningful amounts of beneficial microorganisms.

FORMULA  (#7495)
1/2 Teaspoon (approx. 1 g) provides:
Lactobacillus acidophilus ................................................................. 4 Billion C.F.U.
In a base of maltodextrin

SUGGESTED USE
Adults take ½ teaspoon daily or as directed by a healthcare professional.

SIDE EFFECTS
No adverse side effects reported

STORAGE
Store in a cool, dry place, away from direct light. Keep out of reach of children.
