

Ultra-D Tox™ Capsules

Detoxification Support

DESCRIPTION

Ultra-D Tox™ Capsules, provided by Douglas Laboratories®, contain significant quantities of detoxifying herbs, minerals, and probiotics, as well as vitamin C.

FUNCTIONS

Bentonite powder offers significant detoxification support. It can tightly bind and immobilize toxic compounds, such as aflatoxins, in the gastrointestinal tract. The bioavailability of the toxic compound is greatly reduced in the bentonite bound state. The dietary fiber offered by the psyllium, celery, flax seed powders, and prune concentrate provide many nutritional benefits for the health and detoxifying properties of the gastrointestinal tract. Soluble dietary fiber, such as pectin, many gums, and some hemicelluloses, are fermented in the colon to varying degrees. This results in lower colonic pH (acidity) and the production of short chain fatty acids, important for the health and detoxifying power of not only mucosal cells, but also the intestinal microflora. Probiotic dietary *Lactobacillus acidophilus* colonizes the intestinal tract, depending on the specific bacterium-to-host affinity. Bacteria are continually in competition for colonization space. The original bacterial colonies have an advantage over transient bacteria. Nevertheless, the composition of the intestinal microflora is dynamic and constantly changing. If harmful microorganisms proliferate, the equilibrium is disturbed, and it becomes difficult even for indigenous bacteria to maintain their necessary territory to colonize the intestine. Antibiotics tend to kill off both beneficial and harmful bacteria, and thus may also disturb the normal, healthy balance of intestinal microorganisms. When potent probiotic and detoxifying supplements, such as Ultra-D Tox™ Capsules, are supplied regularly, chances are greatly increased for establishing and maintaining a healthy population of beneficial intestinal microorganisms. Once established, a normal intestinal microflora rich in lactobacilli creates acidic conditions that are unfavorable for the settlement of toxic pathogenic microorganisms. Garlic and mint can be useful in supporting the healthy structure and function of the gastrointestinal tract, especially during detoxification. Vitamin C, as an antioxidant, helps eliminate the highly toxic free radicals that can be very dangerous to many biomolecules in the body.

INDICATIONS

Ultra-D Tox™ Capsules may be a useful dietary supplement for individuals who wish to enhance their natural detoxification systems.

FORMULA (#7594)

Serving Size 1 capsule

Vitamin C 30 mg

Magnesium (from magnesium citrate) ..18 mg

Proprietary Blend..... 470 mg

Bentonite Powder, Psyllium Powder, Barley (leaf), Chlorella (cracked-cell), Garlic (bulb), Lactobacillus Acidophilus, Bromelain, Celery Powder (seed), Aloe Vera Powder (leaf), Prune Concentrate (fruit), Mint (leaf), Flax Powder (seed), and Anise (seed)

Other ingredients: Gelatin, cellulose, and vegetable stearate.

SUGGESTED USE

Adults take 1 capsule 3 times daily or as directed by your healthcare professional.

SIDE EFFECTS

Due to the nature of the ingredients, changes in normal bowel movements may occur in some individuals.

STORAGE

Ultra-D Tox™ Capsules

Detoxification Support

Store in a cool, dry place, away from direct light. Keep out of reach of children.
