

Uva Ursi Max-V

Bearberry for urinary health

DESCRIPTION

Uva-Ursi Max-V, provided by Douglas Laboratories, supplies 200 mg of standardized Uva Ursi and 100 mg of non-standardized leaf in a vegetarian capsule.

FUNCTIONS

Uva Ursi (*Arctostaphylos uva-ursi*), also known as bearberry, is a low-lying evergreen shrub found in Canada, Europe, and Asia. It has been used traditionally as a diuretic, astringent and urinary antiseptic for several hundred years. One of the active components in it, arbutin, releases hydroquinone, which can provide support for a healthy urinary tract.†

FORMULA (#77379)

Each capsule contains:

Uva ursi Herbal extract.....200 mg
(*Arctostaphylos uva-ursi* L.Spreng)
(Standardized to provide 40 mg (20%) arbutin)
Uva Ursi (leaf) non-standardized.....100 mg

SUGGESTED USE

Adults take 1 capsule daily between meals or as directed by a healthcare professional. Not intended for long-term use.

Do not take if pregnant or lactating.

SIDE EFFECTS

Uva ursi may cause nausea, vomiting, gastrointestinal discomfort, and a greenish-brown discoloration of the urine. Uva ursi contains hydroquinone which inhibits melanin synthesis and might lead to retinal thinning if used long-term.

Chronic use, especially in children, can cause liver impairment due to its tannin content.

STORAGE

Store in a cool, dry place, away from direct light. Keep out of reach of children.
