

Seditol® Plus

Herbal Blend for Natural Sleep Support

DESCRIPTION

Seditol® Plus, provided by Douglas Laboratories®, is a proprietary blend of *Magnolia officinalis* and *Ziziphus spinosa*, as well as a comprehensive herbal blend, specifically designed to promote healthy sleep and support the body's normal nocturnal rhythms during stress. †

FUNCTIONS

For many individuals, the hectic pace of a Western lifestyle, lack of exercise and poor eating habits can lead to sub-optimal health. Often, these same individuals do not receive enough sleep at night. The vast majority of health care providers now recommend that individuals receive at least 7-8 hours of sleep. † This lack of sleep has been shown in studies to be a major cause of elevation of stress (cortisol) and appetite (ghrelin) hormones, which is thought to lead to a further progression of poor sleep and eating habits. These poor habits may be part of the factors that determine weight gain, cardiovascular fitness, mental alertness, immune health and other important indicators of optimal health and wellbeing. †

Seditol® Plus is designed to support healthy sleep patterns and help normalize stress hormones, thus leading to better sleep and relaxation patterns.† The main ingredients of Seditol®, Magnolia and Ziziphus, have been used in Traditional Chinese Medicine for hundreds of years and are well regarded for their roles in stress management. † In one clinical trial testing Seditol® in adults, 87% of the participants agreed with the statements "Seditol® helps you relax" "Seditol® reduces fatigue due to lack of sleep" and "Seditol® allows you to wake up feeling refreshed." † In the same clinical trial, 83% of the participants agreed with the statement that "Seditol® helps insure a sound night's sleep." In addition to Seditol®, chamomile, lemon balm and passion flower are included for the relaxing properties they can provide to assist the body's requirement for a restful night's sleep. †

INDICATIONS

Seditol® Plus may be a useful dietary adjunct for individuals wishing to support normal sleep patterns and help reduce stress-induced sleeplessness. †

FORMULA (99446)

1 vegetarian capsule contains:
