HOW DOES ULTRA PREVENTIVE® GUMMY STACK UP?

DID YOU KNOW?

Daily sugar consumption in the United States has increased by 83 calories since 1977. Excess sugar consumption has been linked to obesity, inflammation, oxidative stress, type 2 diabetes, cardiovascular disease, and more.¹⁻² Research even suggests that consuming sugar can drive future sugar cravings.³ Balancing the need to limit added sugar with taste and convenience, each Ultra Preventive® Gummy contains just 0.5 g of sugar, compared to 2 g in many other gummies on the market, using a low-glycemic, plant-based prebiotic fiber and natural sweeteners.*

PRODUCT DETAILS
