

TestoQuench™ for Men Hormone Specific Formulation™

DESCRIPTION

TestoQuench™ for Men is a *Hormone Specific Formulation™* of herbal ingredients that to help moderate the actions of testosterone. This combination of herbs is designed to support the healthy function of the prostate and other testosterone-sensitive tissues in men. †

The Hormone Specific Formulation™ line of products, provided by Douglas Laboratories® and formulated by Dr. Joseph J Collins, was created to support the optimal function of specific hormones through the use of hormone specific adaptogens and modulators of hormone signaling. This formulation may be used as part of a hormone health program with dietary and nutrient support. In addition, these formulations may be used by clinicians as an adjunct to support optimal hormone health in patients who have been prescribed bioidentical hormone therapies. †

FUNCTIONS

TestoQuench™ for Men is a unique combination of phytochemicals designed to promote healthy hormone balance by supporting the ideal function of testosterone-sensitive tissues. These phyto-compounds moderate tissue sensitivity to androgens or the actions of these hormones in part through targeting 5-alpha-reductase, an enzyme that converts testosterone to the more androgenic dihydrotestosterone. Saw palmetto has been demonstrated to moderate 5-alpha-reductase, and may support the function of the urethra. Oral piperine supports higher plasma concentrations of a variety of glycoproteins inhibiting P-glycoprotein (P-gp) and CYP34A. Preliminary studies also show it may inhibit testosterone 5α-reductase. †

INDICATIONS

- Support for prostate health and testosterone balance in men. †

FORMULA (#202410)

Serving size..... 2 veg. caps.....4 veg. caps
 Proprietary Blend..... 1,440 mg2,880 mg
 Saw Palmetto berry Extract (*Serenoa repens*, standardized to 25% fatty acids), *Magnolia officinalis* bark Extract (standardized to 5% honokiol), Stinging Nettle leaf Extract (*Urtica dioica*, standardized to 1% silica), Holy Basil (*Ocimum sanctum*, leaf), *Pygeum africanum* (bark, standardized to 2.5% sterols)
 BioPerine®10 mg 20 mg
 (black pepper fruit extract/*Piper nigrum*)
 Other ingredients: Hydroxypropyl methylcellulose (capsule), silica, and hydroxypropyl cellulose.

BioPerine® is a registered trademark of Sabinsa Corporation
