

Vitamin D Gummy

DESCRIPTION

Vitamin D Gummy provides vitamin D to support daily wellness, including cellular health.‡

INDICATIONS

- Support for immune function and daily wellness‡
- Support for cellular health‡

FUNCTIONS AND MECHANISM OF ACTION

Vitamin D is a fat-soluble vitamin that provides general cellular support, in part by supporting immune cell activity and by maintaining healthy cell metabolism. In a clinical trial, Vitamin D supplementation was shown to support Vitamin D-regulated genes associated with immune function, response to stress, and DNA repair. Vitamin D also supports healthy immune cell activation due to the presence of vitamin D receptors in immune cells, including lymphocytes and macrophages.‡

FORMULA (#202673)

Serving Size 1 Gummy:

Total Carbohydrate	1 g
Total Sugars	<0.5 g
Includes <0.5 g of Added Sugars	
Vitamin D ₃ (as cholecalciferol)	25 mcg (1,000 IU)
