FUNCTIONS

Ultra Preventive® X is a comprehensive multivitamin/mineral combination with a powerful antioxidant blend of organic fruits and vegetables. This unique formula offers adequate Vitamin D and the body's preferred form of readily bioavailable folate, Metafolin®. Metafolin is a patented, natural form of (6S) 5-methyltetrahydrofolate (5-MTHF) is the naturally occurring, predominant form of folate commonly found in cells and is essential for overall health, as it participates as a cofactor in a reaction that involves the remethylation of homocysteine to methionine. This formula also supports bone and vascular health by the addition of Vitamin K2 as MK-7. Efficacious amounts of lutein and zeaxanthin promotes vision health, specifically aiding in protection of the photo-oxidative damage to the macula. †

QÜELL® Fish Oil uses the Supercritical CO₂ advanced technology for extracting fish oil. This method provides the superior protection against oxidation and uses less heat and no chemical solvents when compared to molecular distillation, resulting in fewer unwanted isomer formations and “cleaner” oil. Recent scientific data shows the triglyceride form of fish oil is better absorbed when compared to ethyl esters. The benefits of omega-3 fatty acids continue to emerge and numerous health organizations around the world recommend adequate daily intake of EPA and DHA. Data continues to accumulate that supports EPA and DHA in cardiovascular health as well as many other areas, including neurological health, vision health, and joint health. †

Multi-Probiotic® provides 4 billion live, beneficial intestinal micro-organisms for gastrointestinal and immune health. Probiotic dietary lactobacilli colonize the intestinal tract, depending on the specific bacterium-to-host affinity. Bacteria are continually in competition for colonization space. The original bacterial colonies have an advantage over transient bacteria. Nevertheless, the composition of the intestinal microflora is dynamic and constantly changing. If harmful microorganisms proliferate, the equilibrium is disturbed, and it becomes difficult even for indigenous bacteria to maintain their necessary territory to colonize the intestine. Antibiotics tend to kill off both beneficial and harmful bacteria, and thus may also disturb the normal, healthy balance of intestinal microorganisms. †

Ubiquinol-QH is a softgel containing 100 mg of natural ubiquinol in a patented, naturally self-assembling nano-colloid system called VESIsorb® technology for enhanced absorption. Ubiquinol is the biologically reduced form of ubiquinone, also known as coenzyme Q10. Ubiquinol may be of special importance for older adults looking to support healthy aging and cardiovascular function. †
