

GABA 500mg

DESCRIPTION

GABA 500 mg, provided by Douglas Laboratories®, supplies 500 mg of gamma amino butyric acid per each capsule.

FUNCTIONS

GABA (gamma-aminobutyric acid) is an amino acid that functions as a neurotransmitter in the brain. GABA is synthesized in the brain from another amino acid, glutamate, and functions as an inhibitory neurotransmitter – meaning that it blocks nerve impulses. In the body, GABA is concentrated in the hypothalamus region of the brain and is known to play a role in the overall functioning of the pituitary gland – which regulates growth hormone synthesis, sleep cycles, and body temperature. †

FORMULA (#80611)

Each capsule contains:

GABA (gamma amino butyric acid).....500 mg

SUGGESTED USE

Adults take 1 capsule daily with meals or as directed by physician.

SIDE EFFECTS

No adverse side effects have been reported.

STORAGE

Store in a cool, dry place, away from direct light. Keep out of reach of children.
