

SkinAx²[™] and Ceramosides[™] Promote Skin Hydration and Radiance[‡]

As we age, skin production of collagen declines, which can impact skin elasticity and moisture retention. In addition, environmental stressors can result in damage to the skin cells, which may cause changes in coloration and turnover. SkinAx²[™] is a specialized nutrient blend of clinically studied ingredients containing polyphenolic compounds from grape seed, superoxide dismutase concentrate from melon, vitamin C, and zinc. These are antioxidants that promote skin radiance by supporting healthy skin color, elasticity, and facial luminosity.[‡]

Lipids called ceramides from wheat seed oil are the major constituents between the skin's layers that hold in moisture. Ceramosides[™] phytoceramides have been shown to help support skin moisture 15 days after being taken orally.[‡]

Skin moisture with Ceramosides[™] supplementation
